## DETAILED ACTION

### *Drawings*

1. The drawings were received on January 18, 2005. These drawings are accepted.
2. The drawings are objected to because in Figure 57, it appears that "z<sub>j</sub>" should be "z<sub>k</sub>". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Objections***

3. Claim 2 is objected to because of the following informalities: on lines 2-5, "filtering includes . . . to provide a correlation sequence" duplicates the claim 1, lines 7-9 and should be deleted. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The limitation recited in claim 2 is vague and indefinite. Claim 2 recites that the filtering step (in claim 1, lines 7-9) averages a squared-magnitude of the correlation sequence (see claim 2, lines 5-6). Since claim 1 recites that the step of computing a squared magnitude of the correlation sequence occurs **after** the filtering step, it is unclear how the filtering step averages the result of a subsequent step. Based on the detailed description, the averaging is part of the low-pass filtering step in claim 1.
7. Claims 10-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as originally filed does not describe multiplying the low pass filtered correlation signal or the low pass filtered energy signal by one or more predetermined factors wherein the multiplication is implemented by addition and/or subtractions. Based on the limitations in claim 1, the "low pass filtered correlation signal" corresponds to the output of 3032 and the "low pass filtered energy signal" corresponds to the output of 3039. The detailed description does not disclose multiplying either of these signals by one or more predetermined factors wherein the multiplication is implemented by addition and/or subtractions. Therefore, the claims do not comply with the written description requirement.

#### ***Allowable Subject Matter***

8. Claims 1 and 3-7 are allowed.

#### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
